Experience

2020-2021
GTU
C# developer teamlead

I worked in a team consisting of 4 people on the development of a university library project, which included both back-end and front-end components. I developed and maintained an application written in C# using a SQL database.

2021 - 2022

Fina

IT Technician

For six months I worked as a It technician, assisted in troubleshooting hardware and software issues for employees. Installed, configured, and maintained computer systems and networks. Provided technical support to resolve IT-related problems for end-users. Collaborated with the IT team to ensure the smooth functioning of IT infrastructure.

2022-2023

Laravel developer

I have been working in a team for six months on a project based on Laravel and SSR React. I am responsible for the back-end development of the project, I developed and improved the back-end architecture. I interacted with front-end developers via API calls, ensuring consistency and integration between back-end and front-end. I have worked with hosting applications such as Viper and Laravel Forge to manage and maintain project hosting.
